1K ACRYLIC FLOOR COATING

INTRODUCING THE LATEST ADDITION TO PROFESSIONAL FINISHES...

1K Acrylic Floor Coating is a high-performance water-based acrylic floor paint. This revolutionary product is designed to provide a durable, long-lasting, and aesthetically pleasing solution for a wide range of flooring and sport court applications.

THIS PRODUCT IS IDEAL FOR

Residential Garages

Maintenance Areas
Industrial & Commercial

Workshops

Sport Surfaces

Retail Spaces

Strata
Utility & Common Areas

Available in gallon and five-gallon containers | catering to both small and large-scale projects

FEATURES & BENEFITS

Water-Based Formula

Professional Finishes 1K is formulated with a water-based acrylic technology, making it eco-friendly and low in VOCs (Volatile Organic Compounds). This ensures a safer application process and a reduced environmental impact.

1K Technology

Our 1K (single-component) formula eliminates the need for complex mixing processes. It simplifies the application, making it user-friendly for both professionals and DIY customers.

Quick Drying

With a quick-drying formula this floor coating minimizes downtime during application. The surface is touch-dry within hours, allowing for a swift return to regular operations, crucial for commercial spaces with tight schedules.

Third Party Certifications

This line is approved under MPI (Master Painter Institute) category #60 Low Gloss Floor paint. This approval signifies that the paint has been tested and approved for use in specific environments and conditions.

Exceptional Durability

Professional Finishes 1K offers exceptional durability, providing a tough and resilient surface that withstands heavy foot and light vehicle traffic. It is engineered to resist abrasion, chemicals, and UV rays, ensuring a long-lasting finish. For increased non-skid applications up to 4oz of A-60 Clova-Tex may be added per gallon.

Easy Application

The product is designed for easy application, whether you're a professional contractor or a DIY enthusiast. With its 1K technology, no complicated mixing is required. The smooth consistency ensures even coverage, reducing the chances of streaks or roller marks.

Colour Availability

Choose from a variety of colors to create a clean, attractive, and professional appearance. This line is designed to be used with the Porch and Floor Colour palette to offer a wide range of traditional floor and sport court colours.

HOW TO USE

STEP 1 | Surface Preparation

- Clean surface thoroughly to remove dirt, oil & other contaminants
- Ensure surface is roughened to promote mechanical adhesion
- Repair cracks or imperfections in concrete - paint is not a filler

Note: When overcoating existing floors, ensure the surface is sound and do a patch test to ensure compatibility

STEP 2 | Application

- Stir the paint thoroughly before use
- Apply by brush, roll, or spray. Back rolling is highly recommended when applied by spray
- Ensure even coverage and avoid pooling and overbuild

STEP 3 | Drying Time

- Tack-free in 1 hour; Re-coat in 4 hours
- Allow 48 hours before subjecting the surface to heavy foot traffic or placing heavy objects
- Avoid hot tire exposure for 7 days

SAFETY PRECAUTIONS

- 01 Use in well-ventilated areas
- 02 Wear appropriate personal protective equipment (PPE)
- 03 Keep out of reach of children

Professional Finishes - 1K sets a new standard in floor coating solutions, offering a perfect balance of performance, versatility, and aesthetic appeal.

Whether you are a retail business owner or a commercial contractor, Professional Finishes-1K is the go-to choice for transforming your floors into durable, visually appealing surfaces.
