

Cloverdale Paint

 Canadian Owned & Operated

CEILING LATEX

High Hide Ceiling Finish

Cloverdale Paint's Ceiling Latex is designed to provide high light reflectance and a "fresh new look" to dull or yellowed ceilings. The coating is formulated to reduce roller splatter and dries to a hi-hide, "ultra flat" sheen providing a uniform finish which reduces the evidence of drywall joints, roller & spray patterns and other minor imperfections on ceiling areas. Ceiling Latex is self-priming. It is ideal for use on all texture, acoustical tile and drywall ceiling substrates.

- Improves interior light reflectance
- Quick & easy "refresh" to any room
- Hi-hiding & self-priming
- Low roller splatter formulation
- Ultra flat finish conceals imperfections
