# Master Painter

## Professional Series

Cloverdale Paint's Master Painter professional series is for use on all interior walls and ceilings including drywall, plaster, masonry and primed wood. The complete line of primers and finish coats are formulated to meet MPI (Master Painter Institute) performance specifications and engineered to provide maximum productivity for competitive new construction and commercial applications. All Master Painter primers and finishes meet and exceed Environment Canada Volatile Organic Compounds (VOC) regulations and meet approval standards for use on LEED construction projects.

Key features & benefits include low splatter, excellent hide and touch-up properties that mean reliable and productive results with every use.

Professionals choose Cloverdale Paint's Master Painter series to meet quality approval standards specified by architects and where maximum value and productivity is required to compete on aggressive, new construction and repaint applications.
