Renaissance®

Interior / Exterior Waterborne Alkyd Enamels

Cloverdale Paint's Renaissance® line is an advanced hybrid waterborne-alkyd emulsion enamel system for interior or exterior surfaces, delivering higher performance and outstanding versatility. The hybrid formulation technology provides the application characteristics and forgiveness of an alkyd enamel during application, but with the convenience, low odour and easy clean-up of waterborne paints.

Renaissance® enamels are an excellent choice for a durable, smooth finish over a variety of interior and exterior surfaces. Use Renaissance enamel over primed doors, millwork and cabinets. Ideal for use on exterior doors, shutters, fascia and soffits. Renaissance provides adhesion on difficult to paint surfaces such as composite & engineered woods, laminates and fiberglass substrates. Renaissance can also be applied to primed ferrous and non-ferrous metals.

Key features include excellent adhesion, abrasion resistance and super premium flow and leveling properties for a smooth "spray like" finish even when applied by brush or roller, resulting in a "best in class" finish with every use. Renaissance® is the preferred choice of professional painters for interior and exterior fine finish applications.

Renaissance® Series:

0345-Series Melamine Sheen (GL4)

0311-Series Semi-Gloss (GL5), MPI #169

Renaissance® Product Information

For more detailed information, refer to the Technical Data Sheet, available at www.cloverdalepaint.com

Solids by Volume

Product	SKU Codes	Volume Solids
Melamine Sheen	0345-Series	40%
Semi-Gloss	0311-Series	40%

Sheen Levels

Product	Gloss @60°	Gloss Level
Melamine Sheen	30-35 Units	GL4
Semi-Gloss	45-55 Units	GL5

VOC Rating (g/L)

Product	Base	VOC
Melamine Sheen	White	< 50
Semi-Gloss	White	< 55

Practical Spread Rate (ft² / gallon)

Product	Spread Rate
Melamine Sheen	350 - 500 ft²
Semi-Gloss	350 - 500 ft²

Dry Times at 20°C, 50% Relative Humidity

To Touch	Re-Coat	Thorough Dry
1 hour	6 hours	24 hours

Thinning

Up to 10% with clean water for HVLP Spray.

Clean-up

Clean application equipment with warm, soapy water.
